CAREER OBJECTIVE

Software engineer experienced in building web and cloud applications, focused on clean, maintainable code and reliable delivery. Dedicated to continuous learning and disciplined work habits, with a growing interest in artificial intelligence and its real-world applications. Aspires to expand expertise in AI-driven system design, enhance decision-making through intelligent automation, and progress into higher-impact roles, owning complex systems, mentoring peers, and contributing to scalable, user-centered products.

TECHNICAL SKILLS

Programming Languages: C#, C++, Java, JavaScript, TypeScript, Python
Frameworks, Libraries & Tools: DotNet, React, NodeJS, Redis, PostgreSQL, LangGraph, LangChain, LlamaIndex, Vector DB
DevOps & CI/CD: Azure DevOps, Azure Pipelines, Bicep, Docker
Cloud & Azure Services: Azure Entra ID, App Insight, Log Analytics Workspace, Azure Key Vault, Function App,
Scripting & Command Line: PowerShell, Git Bash
AI & Agent Skills: Agent Architecture, Ollama, MCP Servers, Copilot, Cursor, Claude, Computer Vision, ML
CS Fundamentals : Data Structures, Algorithms

WORK EXPERIENCE

Software Engineer - [Cefalo Bangladesh Ltd.](#)

Consultant Engineer(Cloud Team): [KPMG Technology Service](#)

Aug 2022 - Jan 2026

nTAAP: Built nTAAP, an Azure App Services-based **automation platform** that orchestrates robust workflows cutting ~**95%** of manual, repetitive work and significantly speeding up service delivery.

UI (React): Built production **React UI** with Hooks, reusable components, performance optimization (lazy loading, memoization), state management (Context API, React Query), .NET REST integration, CI/CD automation

Distributed Systems: Architected an **event-driven microservices system** using **Azure Service Bus** and **Redis** for decoupled communication and performance.

Database Architecture & Development: Designed and integrated a **Cosmos Graph DB** solution, developing a **custom adapter** and complex **Gremlin queries** to enable efficient querying of dynamic data relationships.

RBAC Based AuthN & AuthZ: Architected a full-stack **RBAC framework**, integrating **Azure Entra ID** with a custom database to enforce granular authentication and authorization.

Test Engineering: Led the test automation strategy by designing unit tests with xUnit, achieving more than **90%** line and branch coverage, and architecting the end-to-end test process, including test plans, cases, execution, and reporting.

Cloud Services: Orchestrated the **Azure App Service** operational backbone, managing **identity**, secrets, performance and logging through integrated services including **Entra ID, Key Vault, Application Insights and Log Analytics**.

Trainee Software Engineer

Mar 2022 - Aug 2022

TechTalk: Developed TechTalk, a full-stack blogging platform with [React](#) frontend and **RESTful APIs** using [.NET/Node.js](#), implementing secure authentication middleware for user verification and resource management.

Comprehensive Training: Accelerated proficiency in various technologies through hands-on development and mentorship from specialized trainers.

Teaching Assistant - [CSE, Jahangirnagar University](#)

Sep 2020 - Aug 2022

Leadership: Led specialized technical training programs focused on C, C++, Data Structures, and Algorithms topics to build a strong competitive programming posture for the institution, accumulating **200+** trainees over two years.

Mentoring: Managed the training lifecycle by coordinating sessions, designing practice contests, and analyzing performance metrics to ensure continuous skill development.

PUBLICATIONS

[Classification of Social Media Users Based on Temporal Behaviors and Interests:](#) Proposed a temporal modeling approach to track and classify users' topical interests over time using a fading time-window on social activity streams. Experiments demonstrated that users within the same category exhibit similar temporal patterns in the evolution of their interests.

[Heart Diseases Prediction Using Multiple Machine Learning Techniques:](#) Developed a heart disease prediction model based on clinical parameters using multiple machine learning techniques, including K-means, FCM, SVM, FIS, LR, MLR, Neural Networks. Combined hybrid models achieved improved performance, attaining over 94% detection accuracy.

EDUCATION

[Jahangirnagar University](#)

Savar, Dhaka

M.Sc. in CSE | CGPA 3.78/4.00

Jul 2022 - Jul 2023

B.Sc. in CSE | CGPA 3.48/4.00

Mar 2017 - Jun 2022

AWARDS & ACHIEVEMENTS

- **1st** (Global), [Codechef October Challenge 2018](#)
- **3rd**, [2019 Cub Hunting Programming Contest](#)
- **19th**, [2019 ICPC Dhaka Regional](#) (Team: JU_3divides3)
- **23rd**, [2020 ICPC Dhaka Regional](#) (Team: JU_Amigos)
- **25th**, [2019 ICPC Dhaka Regional Preliminary](#) (Team: JU_3divides3)
- Participated in more than **20** regional, national, and inter-university Programming Contests
- Solved over **1,500+** programming problems on different on-line judges
